

PROVIDERS INFORMATION

PURGADORES DE CONDENSADO S.L. with the aim of continuously improving the products and services offered to its customers, it annually re-evaluates its providers based on their behavior throughout the year.

The main criteria used for initial homologation are:

- Quality of the product or service provided.
- Compliance with the agreed delivery date.
- Quality - price ratio of the product or service.

For the annual reassessment, the number and severity of the “Non-Conformities” opened throughout the year and linked to the number of orders in which it has participated are studied by Management, assessing the continuity of the approval.

For all of the above and being consistent with what is defined in our Quality policy, we extend to providers and contractors our commitment to respect customer requirements.

From **PURGADORES DE CONDENSADO S.L.** we want to thank the providers for their dedication, to continue giving the best products and services to all our customers.
